Subject: did you see this?

I will check in with Joel

Sen. Dianne Feinstein (D-CA): Brent Maier received an inquiry from Ken Rooney, Legislative Assistant in the Senator's DC office who called with some questions related to Exide and the NPL listing process. Ken stated that the Senator's office has been contacted by constituents asking about whether the Exide site could be listed on the Superfund NPL list and whether or not a potential settlement would impact the listing process. Brent provided Ken Rooney with information and a link to EPA's NPL listing process. In addition, Brent spoke with Kara Christensen in our Office of Regional Counsel and Joel Jones in our Enforcement Division's Air Waste and Toxics and they told me that since Exide is a pending enforcement matter, we are not able to provide any update on the status of negotiations or settlement. However, generically, an enforcement action would have no impact on the listing process.

Amy C. Miller, Deputy Director

Enforcement Division
